

## CWF 5001 ANTI-LIGATURE / HAND DRAWN

Anti-Ligature systems are purposely designed to reduce the risk of self-harm. Developed for installation in public and private hospital areas, the 5001 Anti-Ligature system is designed with the use of powerful magnetic parts that connect tracks to brackets. When an excessive load (approx. 20kg) is applied, the magnetic system releases from its fixation points. Tested and certified by the Danish Technological Institute.
