CURTAIN TRACK & ROMAN BLIND KIT CATALOGUE
CORCORAN WINDOW FURNISHINGS

Dear Customer,

In this catalogue you will find our extensive range of curtain tracks and Roman blinds kits, both manual and motorised, as well as a list of coordinating accessories. Each track and kit comes with a list of unique specifications to ensure you are choosing the appropriate product. Each catalogue comes with a corresponding separate trade price list, allowing you to use your catalogue as a brochure with your customer and assist in the decision-making.

Corcoran Window Furnishings was founded in 1976 by Nuala and Gerry Corcoran. Starting from humble beginnings, and through hard work and dedication, the company has evolved into a national wholesale company providing retailers, designers and architects with all their window furnishing needs.

In the early 2000's we were the first company to introduce the Roman blind kit to the Irish market, single-handedly transforming how windows were covered. Over the last 25 years, we have continued to develop and adapt our designs and specifications to ensure we are bringing you the latest styles and technologies at a competitive price.

In 2012 their daughter Madeleine rejoined the company. Madeleine, a qualified Interior Architect spent 5 years working in the design field on mid to large sized design projects in both the UK and Australia before returning to Ireland with this valuable knowledge and experience, to work alongside her parents in the family business.

In 2021 Madeleine stepped into her parent's shoes and started managing the company as CEO.

Now in 2024, we continue to bring you a specialised service in all aspects of curtain tracks and roman blind kits. We have recently expanded our motorised collection to 5 different ranges in 15 different colours. We continue to master our bending techniques while also adding to our 'CIRCLE' range, our environmental range of curtain tracks, in line with the EU's Circular Economy.

CHILD SAFETY - CORD DRAWN TRACKS

Making window dressings safer for homes and infants is an integral part of our philosophy, so we have developed a risk assessment for Cord Drawn Curtain Tracks. Each track system comes complete with safety labels, devices and instructions.

OPERATING CORDS

All cord drawn window dressings pose a potential risk to cause strangulation or entrapment for children. Current Child Safety Legislation does not include Corded Curtain Tracks so CWF Ltd. have developed a Curtain Track Cords Risk Assessment to reduce the associated risks.

Hand-drawn or motorised curtain tracks have no operational cords for children to get tangled in, therefore minimising the risk of strangulation and making them a much safer option than cord operated curtain tracks.

All CWF made-to-measure cord drawn curtain tracks are supplied with a cord tensioner device as standard and extendible curtain tracks are supplied with a Child Safety P-Clip device. Either device can be used to secure a curtain cord close to the wall, however it should be noted that a cord tensioner operates with a spring to keep the cord in tension, allowing for ease of use when opening and closing curtains.

Unlike window blind systems, there is no breakaway option available for curtain track cords. Therefore, referring to standards IS EN 13120:2014 and EN16433 for guidance, the recommended height for securing the cord is $\geq 150\text{cm}$ from the floor. At this height, however, it may be extremely difficult to operate the curtain track because of the force required.

SCENARIO 1: $\geq 150\text{CM}$ FROM FLOOR

A curtain track cord can be secured no less than 150cm from the floor, however, it may be extremely difficult to operate the

curtain track because of the force required, depending on the weight and length of your curtains.

SCENARIO 2: $\leq 150\text{CM}$ FROM FLOOR

Secure the cord at the lowest point possible, i.e. secured to the skirting board.

Fixing the cord above the lowest point and less than 150cm from the floor increases the risk of child entanglement and strangulation.

Where no specific cord drop measurement is given, CWF Ltd will supply a 250cm cord with all Made-to-Measure cord-drawn curtain tracks. A cord drop of 250cm allows enough length for the cord to reach floor level from an above average height window, so it can be adjusted as necessary and secured at a safe level. All cords can be easily adjusted on-site to reduce risk of strangulation. Please refer to installation instructions for how-to:

- Adjust cord drops
- Fit safety devices
- Reduce risk of strangulation
- Place cord on either right or left side of track
- Convert cord-drawn track to hand-drawn track

A free copy of CWF Risk Assessment of Curtain Track Cords is available from CWF Ltd. Please email info@cwf.ie or phone 044 9371038 for a copy.

CHILD SAFETY DEVICES - CORD DRAW TRACKS

PLACEMENT OF CHILD SAFETY DEVICES

Secure the cord at the lowest point possible via an appropriate cord tensioner or a P-Clip. Please note that whilst this mitigates the risk, it does not eliminate the risk associated with child strangulation and entanglement. Therefore, end users must take appropriate steps to put additional controls in place to reduce the residual risk.

Warning

Young children can be strangled by loops in pull cords, chain, tapes and inner cords that operate the product.

To avoid strangulation and entanglement, keep cords and chains out of the reach of young children. Cords may become wrapped around a child's neck.

Move beds, cots and furniture away from window coverings. Do not tie cords together. Make sure cords do not twist and create a loop.

CWF 1100

HAND DRAWN CURTAIN TRACK SYSTEM

CWF 1100

HAND DRAWN CURTAIN TRACK SYSTEM

Part of our Circle Sustainable Products, The CWF 1100 CIRCAL© is a new single channel contract curtain track suitable for curved applications. The smooth curves, strong "wings" and small bending radius making it an ideal track for many applications, especially bay windows. Made out of a minimum of 75% reused aluminum post-consumer materials. The CWF 1100 CIRCAL© also features Record low CO2 footprint of 2,3 kg per kg aluminum produced, a massive 87% reduction from the global average of 18 kg. CWF 5408

HAND DRAWN CURTAIN TRACK SYSTEM

CWF 5408 MULTI CHANNEL NARROW / 3-WAY HAND DRAWN CURTAIN TRACK SYSTEM

Our most popular multi-channel track, used widely in hotels throughout Europe. The three-way curtain track allows a voile on the back track and one curtain on each of the front tracks, allowing for a large overlap – essential for achieving exclusion of light in hotel rooms.

Colours:

What are the benefits of RTS technology?

- RTS transmissions pass through walls. You do not necessarily have to be near your awning or other type of application in which a Somfy motor is incorporated: operating is also from another room or from another floor.
- RTS has a handy and self-adjustable “my” function with which you can easily give a product a fixed, favorite intermediate position. You can change it at any time.
- No additional wires are required for operation. The receiver is in the motor. The only wire required is from the RTS motor to the power supply.
- You can combine controls and controls as desired and expand the system at any time with additional remote controls, wireless wall controls and app control.
- With RTS you can also apply compatible sensors that respond to weather change. For example, a Somfy RTS sun sensor lowers your sun protection during sunlight measurement and the wind sensor collects the sun protection in time if it starts to blow too hard.
- Safe operation with a rolling code reduces interference with other radio products.

Single channel operation

Operate 1 electric roller blind (or other application) individually or a group of roller blinds simultaneously.

Multi channel operation

Operate 1 to 5 electric roller blinds (or other applications) individually or as a group. Expandable up to 16 channels with individual control.

SELF BENDING AND SUPER FLEXIBLE

The flexible curtain track is perfect for windows where you have a curve or feel that straight curtain tracks are not going to achieve the effect you want. In addition, we can also see them in places like caravans or motorhomes, where thanks to being able to mold it you will be able to adapt it without any problem.

This curtain rail is fully moldable and tool-free so you can shape it into whatever shape you need when it arrives at your home, it installs like any other rail and comes with everything you need to hang it, all you have to worry about is making the fabric that you like the most to hang it.

The Double T flexible curtain track is hand operated, so you can play with the curtain and move it freely around the track.

What are the benefits of RTS technology?

- RTS transmissions pass through walls. You do not necessarily have to be near your awning or other type of application in which a Somfy motor is incorporated: operating is also from another room or from another floor.
- RTS has a handy and self-adjustable “my” function with which you can easily give a product a fixed, favorite intermediate position. You can change it at any time.
- No additional wires are required for operation. The receiver is in the motor. The only wire required is from the RTS motor to the power supply.
- You can combine controls and controls as desired and expand the system at any time with additional remote controls, wireless wall controls and app control.
- With RTS you can also apply compatible sensors that respond to weather change. For example, a Somfy RTS sun sensor lowers your sun protection during sunlight measurement and the wind sensor collects the sun protection in time if it starts to blow too hard.
- Safe operation with a rolling code reduces interference with other radio products.

Single channel operation

Operate 1 electric roller blind (or other application) individually or a group of roller blinds simultaneously.

Multi channel operation

Operate 1 to 5 electric roller blinds (or other applications) individually or as a group. Expandable up to 16 channels with individual control.

ARCHED WINDOW VALANCE

TRACK WITH VELCRO HOOK TAPE AND FOR CURTAIN HOOKS

For installing stationary curtain panels or roman blinds on regular or arched windows. Direct ceiling mounted for fitting in recess. Can also be wall mounted by using two lengths of profile back-to-back. For large windows simply butt two or more tracks together.

TRACK WITH VELCRO HOOK TAPE

- Complete with hook tape for attaching the curtain with loop tape.
- Hook tape is permanently bonded to plastic strip.
- Notched every 2 inches to create easy curves.
- Slots every 3 1/2 inches, for easy installation.
- Fire retardant.
- 122cm length.

TRACK FOR CURTAIN HOOKS

- For installing stationary, pleated curtains using curtain pins in an arched or apex window.
- Notched every 2 inches to create easy curves.
- Slots every 3 1/2 inches, for easy installation.
- 122cm length.

MOUNTING OPTIONS

This track can be direct ceiling mounted, without brackets, through pre-formed slots every 3 1/2 inches.

CHILD SAFETY

CORCORAN WINDOW FURNISHINGS

CHILD SAFETY - ROMAN BLINDS

CWF SAFE AND CHILD FRIENDLY SYSTEMS

Our blind systems are tested to IS EN 13120:2014, in accordance with test methods specified in EN16433. Each system comes complete with all the labels, safety devices and instructions to make your blind compliant.

OPERATING CHAIN

Current Child Safety Legislation now demands that we ask you for the installation heights when making your “Made-to-Measure” systems as these have a bearing on the maximum continuous chain drops allowable. These chains must then be attached using our child safety device (3909) to minimise the risk of strangulation. Full instructions are included with every dispatch and we stress these must be followed for your system to remain compliant.

The chain size is not always convenient for every customer so we offer a chain breaker device (3021). This will cause the chain to break within the prescribed maximum load of 6kg and in turn allows the use of chains down to no less than 60cm from the floor. Please note in these cases you should not install the ‘P-Clip’ supplied with our systems. It does however carry the limitation of not passing through the chain house so will not operate with 1:4 units. Using our 1:1 chain house will allow the successful operation of the chain breaker, providing your chain loop is at least half the length of your Roman Blind when fully lowered.

Sometimes it can be difficult to operate blinds while using a chain restrained by safety devices, so we now offer a safety pull-away chain mechanism. This innovative device releases within the prescribed maximum load of 6kg and in turn allows the use of chains down to no less than 60cm from the floor. It easily pops back into position after being removed and operates with both 1:1 and 1:4 units. Please note in these cases you should not install the ‘P-Clip’ supplied with our systems. Compatible with our Workroom, Deluxe and Multipurpose headrails.

For those customers preferring the security of using continuous chains only, we now offer a much wider range of drop sizes for your convenience. Please see page 147 for full details.

A free booklet on Child Safety is available from Corcoran Window Furnishings Ltd. Please email info@cwf.ie or phone 044 9371038 for a copy.

Warning

Young children can be strangled by loops in pull cords, chain, tapes and inner cords that operate the product.

To avoid strangulation and entanglement, keep cords and chains out of the reach of young children. Cords may become wrapped around a child's neck.

Move beds, cots and furniture away from window coverings. Do not tie cords together. Make sure cords do not twist and create a loop.

Clip-on Safety Orb

Simply clip on to pocket tape and adjust cord as required.

No sewing required!

Easy solution for child safety compliance.

CWF Kits are independently tested and 100% compliant with Child Safety Standards EN13120: 2014.

The Company offers free training days of our products on a monthly basis, this is to ensure that the Buyer has an extensive knowledge of our products. As a result, the Company will not be responsible to specify a product or manufacturing process for the Buyer.

3. MAKING THE CONTRACT

No sales person agent or employee of the Company is an authorized representative nor authorized either to confirm or vary these Conditions or to make any representation or promise on the Company's behalf.

Title to *the Goods* shall remain vested in (the Seller) and shall not pass to (the Buyer) until the purchase price for (the Goods) has been paid in full and received by (the Seller).

4. ORDERS

(a) All orders placed by the Buyer will be governed by these Conditions.

(b) Orders can be received by the Company in the following ways: Email, Text or Fax.

(c) Where possible the Company does not accept orders over the Telephone. If in extreme circumstances an order is taken over the phone, the order will still need to be confirmed by the Buyer. The Company will send via either email, text or fax the order in written form to the Buyer for confirmation from the Buyer. If the order is not confirmed it cannot be processed.

(d) The Company request that all orders for made to measure items are given via order forms supplied by the Company. Failure to fill in the required forms may result in delayed or suspended orders. Errors made to the order, due to failure to fill in the form, will be the sole responsibility of the Buyer and the Company will demand full payment for such items.

(e) The Company makes use of an order form for certain products that will need to be completed in order to have the order processed.

(f) It is the responsibility of the Buyer to ensure that all the details for the Company to complete the order are given when placing the order.

(g) The Company only accepts measurements in a WIDTH x DROP format. It is the Buyers responsibility to ensure that all measurements are sent to the Company in that format. The Company does not take responsibility for made to measure items where the measurements were given incorrectly.

(h) If an order has not been processed in any way we will accept cancellation. Should we have pro-

(j) Photography in any of our brochures, pricelists, website or any other visual material used by the Company to provide visual information, is for guidance and we always recommend selections should be made from point of sale or samples available.

(k) All Made-to-Measure items are produced in accordance with the Buyers instructions. The Company does not take responsibility for misgiven information and in turn incorrectly made items. Order forms should be filled in to confirm instructions.

(i) Please allow sufficient fabric for hems when calculating fabric quantities, this is also noted on your order forms. We will not be responsible for delays caused due to not enough fabric being supplied. It is the Buyers responsibility to calculate fabrics quantities, including pattern repeats and hems.

(ii) All fabric must be clearly marked as to which is the FRONT and TOP of the fabric. CWF Ltd will not be held responsible for blinds made upside-down or inside-out, if not clearly marked.

(iii) If you supply the fabric, CWF will not be held responsible for any blinds manufactured with flaws in the fabric.

(iv) If a product is damaged or not to your satisfaction, the product must be returned to CWF premises for inspection. If not returned, there is nothing more the Company can do to facilitate the Buyer. The Company will not call to customers home to examine or investigate blinds, unless the Company decide to make a special case of the situation. The Company will not remake or replace such products, without viewing and examining the original product here on our premises.

i. The company's liability under Condition 4(a) shall be limited to repairing or replacing the damaged or as the case may be the lost goods that the Company originally supplied (no third-party products from other companies will be replaced or items that were supplied to us by the customer) and the Company shall not be under any other liability there under whatsoever.

(v) All measurements for blinds and curtains must be given in accordance with the order form.

(vi) In accordance with the Child Safety Standard EN13120, all blinds will be dispatched with 1mtr chains unless installation heights are provided. It is the fitter's responsibility to then adjust chains on site if necessary.

(vii) All curtains or roman blinds, whether machine sewn or hand stitched, have the risk of light penetrating through the holes created when manufacturing the curtains. We will not accept responsibility for these holes created, particularly when using blackout lining. It is the Buyer's responsibility to explain and agree this with their customer prior to ordering.

6. PRICE AND PAYMENT

(a) All Prices are those ruling at the date of acceptance of order by the Company and are net exclusive of VAT and carriage.

(b) Credit accounts Buyers, unless otherwise stated all invoices are due for payment 30 days from date of Statement. Overdue accounts will be placed on hold if the account is not settled within a maximum of 15 days from the payment due date.

(c) The Company reserves the right to charge interest on all overdue accounts at 3% per annum above the bank rate. Such interest will be deemed to accrue on a day to day basis from the date payment becomes due under Clause 6(d)

(d) Pay in advance Buyers can pay via online banking, sage pay (link emailed with invoice), card payment over the phone, cheque, or cash in person.

(i) Once notified of total amount due, it is the Buyers responsibility to pay the invoice in a timely matter. The Company will not be responsible or liable in any way, for delays with orders due to late payment.

(ii) Online bank payments may take approximately 3 working days to show in our accounts, please notify the Company with proof of payment within this timeframe to avoid delays with orders.

(iii) Orders only begin manufacture once payment or proof of payment is received.

(e) The Company reserves the right at any time prior to delivery of the Goods to adjust the price to take account of any variation in any duty payable by the Company directly or indirectly, the cost of raw materials, labour or services or the cost of imported goods due to exchange rate fluctuations.

(f) Where a Buyer's local currency differs from the Company an average exchange rate that is updated on a monthly basis in line with exchange rate fluctuations will be in effect.

(g) It is not the responsibility of the Company to continually contact the Buyer for payment of goods should payment need to be provided before goods can shipped.

(h) Prices on branded products are based on the current pricelist and maybe subject to change.

7. DELIVERY

(a) The Company shall be deemed to have delivered the goods either when the goods are dispatched from the Company's premises or (as the case may be) when the goods are ready for collection at the Company's premises.

(e) The Company cannot accept any responsibility for delays in orders due to a delay in confirming full order details and/or payment of the goods.

(f) Please allow the following approximate dispatch time frames;

(i) 15 x working days for Curtains (once both fabric & instructions are received).

(ii) 10 x working days for Roman Blinds & TwinTex blinds (once both fabric & instructions are received).

(iii) 5 x working days for Roller Blinds (8 x working days during busy periods).

(iv) 4 x working days for Curtains Tracks.

(v) Same day dispatch where possible or 1-day dispatch for Roman Blind Kits

(g) With regards to condition 7(f), although the Company aims to adhere to the above time-frames, or improve where possible, during busier periods, these dispatch time frames may extend. The Company will not be liable in any way for costs accrued to the Buyer for goods dispatched outside of these time frames.

8. RETURNS

Corcoran Window Furnishings do not accept returns but the following exceptions do apply.

(a) Faulty:

(i) If an item is faulty upon delivery, the Buyer needs to notify the company no later than 8 working days after delivery date. The faulty or damaged item needs to be returned to the Company for an inspection before any action can be taken. Returned goods need prior arrangement.

(b) Incorrectly Ordered:

(i) If in the case of an item being incorrectly ordered by the Buyer, The Company will not accept the return unless in extreme circumstances and with prior approval from management. There will be a €20.00 restocking charge on each item returned.

(c) Products that cannot be returned or cancelled include, but not limited to, cut lengths of fabrics, cut lengths of trimmings, cut length of linings, all made to measure items, paint to order and any other item customized for Buyer.

- (i) All parcels outside of the island of Ireland will have to be quoted per order.
- (c) Please note, as courier services are predominantly outsourced, the Company carriage charges to the Buyer may change at any time to be inline with price increases from our courier suppliers. We will notify the Buyer as soon as possible to notify them of such increases as they occur.
- (d) The Company does not take any responsibility for goods delivered to an address that is different to the Buyers registered address.

10. COLLECTIONS:

- (a) CWF Ltd offer a free collection service within the Rep of Ireland or Northern Ireland for any fabric being sent to use for the manufacture of bespoke curtains, blinds, cushions etc.
- (b) Any other collections that are required are based on carriage charges in condition (9)
- (c) When arranging collections, we do our best to arrange them the same day, however please an extra day to avoid disappointment.

11. DAMAGED IN TRANSIT

- (a) The Company shall not be responsible for damage to any of the goods or loss of the goods or part thereof in transit unless the buyer gives notice of a claim to the Company and to the carrier.
 - (i) In the case of damage within 24 Hours after having received the goods
 - (ii) In the case of loss within 5 working days of the date of the invoice.
- (b) The company's liability under Condition 11(a) shall be limited to repairing or replacing the damaged or as the case may be the lost goods that the Company originally supplied (no third party products from other companies will be replaced or items that were supplied to us by the customer) and the Company shall not be under any other liability there under whatsoever.

12. WARRANTIES

- (a) If within 14 days of receipt of the goods by the Buyer any of the goods shall be found to be defective the Company may at its option either repair or replace any part of the goods or make an equivalent quantity of the goods available to the buyer free of charge ex-works or repay a corresponding proportion of the Price to the Buyer but shall not be under any other liability.
 - (i) Under Condition 10(a) the company may request the said goods to be returned to Company premises for inspection, prior to any repair or replacement being agreed or made. Failure to

(d) Except to the extent provided for in Conditions 12(a) the Company shall not be liable for any loss, damage or injury however caused or arising and shall not be liable for any indirect or consequential loss whatever and however caused.

(e) All descriptions, representations, drawings and other particulars furnished or made orally by the Company or in catalogues, price list or other documents issued by the company are given for general information purposes only and the buyer acknowledges that it is not entering into the Contract in reliance upon any such description, representation drawing or other particular.

(f) Without prejudice to the generality of Condition 12(e) the company gives no warranty and makes no representation that any sale by the Buyer of the goods will be free from infringement of any patent of similar protection owned or controlled by any third party. Where the goods are produced by the company in accordance with the Buyer's specifications or drawings, the Buyer shall indemnify the Company against all costs, claims, damages and expenses to which the Company may become liable as a result of the infringement or the alleged infringement of any patent registered design or any other intellectual property right.

13. RETENTION OF TITLE

(a) The property of the goods will remain in the Company and the Buyer will hold the goods as bailed for the Company until payment in full of the Price (in the Condition referred to as "payment")

(b) The Buyer shall keep the goods separate and clearly identified as the property of the Company until Payment.

(c) If the Buyer shall (before Payment) sell the goods to any third party (in Condition referred to as "the Customer") it shall hold the proceeds of sale as the fiduciary of the Company pending Payment and shall if the Company so require authorize and direct the Customer to pay the Company all sums due to the buyer in respect of the goods so sold and assign to the Company the debt owed to the buyer by the customer.

(d) Any sale as is referred to in Condition 13(c) is authorized by the Company only if made in the ordinary course of the Buyer's business.

(e) The goods shall remain the exclusive property of the Company notwithstanding that they may be converted into Products (as hereinafter defined) and all the Company's rights in the goods shall extend to Products provided that the Company's title shall not extend to any goods supplied by a third party and the Company shall not lay claim to the proceeds of the sale of any goods so supplied.

(f) The Company may enter upon the Buyer's premises without notice and recover the goods which have not been paid for in full and as between the Buyer and the Company this Condition will constitute the authority of the Buyer to the Company to enter on the premises of any other person holding the goods as the Buyer's agent and on whose property the goods may be and to remove the goods.

(g) For the purpose of Condition 13(e) "Products" shall mean any goods supplied by the Company

(b) The Company's right under Conditions 14(a) shall be exercised by written notice to the Buyer and in the event of such notice being given, the Contract and (as the case may be) any such other contract shall terminate on receipt of the notice by the Buyer and the Company shall be relieved of all liability under the contract and any such contract.

15. FORCE MAJEURE

(a) The Company shall not be liable for any failure to deliver the Goods arising from circumstances outside the Company's control. Non-exhaustive illustrations of such circumstances would be act of God, war, riot, explosion, abnormal weather conditions, fire, flood, strikes, lock-outs, Government action or regulations (whether of the Republic of Ireland or otherwise), delay or failure by suppliers, accidents and shortages of materials, labour or manufacturing facilities.

(b) Should the Company be prevented from delivering in the circumstances set out in sub-clause 15(a) it shall give the Buyer written notice of this fact as soon as reasonably practicable after discovering it.

(c) If the circumstances preventing delivery are still continuing 3 months after the notice then either party may give written notice to the other cancelling the contract.

(d) If the contract is cancelled under the provision of this Clause the Company will ensure that any funds that have been paid by the Buyer are made available as a credit on their account, for them to use for any further orders.

16. NOTICES

Any notice to be given under these Conditions may be delivered or be sent by prepaid post or registered courier, addressed to the party to be served at its registered office for the time being or (if not a company) the address for that party last known to the party giving the notice. Notices served by post (except where expressly provided otherwise) be deemed served on the second business day after the date of posting. For the purposes of this Condition 14 "business days" means a day on which banks are open for business in the place both of posting and of address of the notice.

17. MISCELLANEOUS

(a) Where the Buyer has specified that the goods are to be of a certain colour or size such specification shall be subject to reasonable commercial variation.

(b) The Company may at its absolute discretion make a reasonable storage charge for custody for all goods standing to the credit of the Buyer or to the Buyer's order.

(g) Clause heading are for ease reference only and do not affect construction.

18. IMPORTANT GENERAL INFORMATION:

(a) Please quote our product reference numbers wherever possible.

(b) The Buyer should not sign for any delivery unless they have first checked their goods. Any goods signed for in good condition, which subsequently are noted as damaged when unparcelled, the Company or the Courier will not accept any liability for any damaged goods.

(c) We regret that the Company cannot accept responsibility for fabric faults once the fabric has been cut by the Buyer.

(d) If the Buyer's customer cancels the order after the order has been sent for manufacture, we cannot except cancellation of same goods.

(e) We reserve the right to withdraw any designs, colours, products etc. (Due to unforeseen circumstances)

(f) We advise the Buyer not to book a fitter or any other trades person to undertake work until the Buyer has received and checked all the correct supplies.

(g) Photography is for guidance only and selections should be made from shade cards, samples etc provided.

(h) If a product is damaged or not to the Buyer's satisfaction, the product must be returned to the Company's premises for inspection. If not returned, there is nothing more the Company can do to facilitate you. The Company will not call to the Buyer's customers home to examine or investigate blinds, unless the Company decide to make a special case of the situation. The Company will not remake or replace such products, without viewing and examining the original product here on the Company's premises.

(i) We cannot accept any responsibility for any costs if the Buyer does not follow this advice.

(j) We reserve the right to refuse credit.
